PERGAMON

AIMS AND SCOPE

Journal of the Mechanics and Physics of Solids. The Journal publishes papers reporting original research on the mechanics of solids. Emphasis is placed on the development of fundamental concepts of mechanics and novel applications of these concepts based on theoretical, experimental or computational approaches, drawing upon the various branches of engineering science and the allied areas within applied mathematics, materials science, structural engineering, applied physics and geophysics. The main purpose of the Journal is to foster scientific understanding of the processes of deformation and mechanical failure of all solid materials, both technological and natural, and the connections between these processes and their underlying physical mechanisms. In this sense, the content of the Journal should reflect the current state of the discipline in analysis, experimental observation and numerical simulation. In the interest of achieving this goal, authors are encouraged to consider the significance of their contributions for the field of mechanics and the implications of their results, in addition to describing the details of their work.

CONTENTS OF VOLUME 43

Number 1

M. MARDER and S. GROSS	1	Origin of crack tip instabilities
P. SOFRONIS and H. K. BIRNBAUM	49	Mechanics of the hydrogen–dislocation–impurity interactions—I. Increasing shear modulus
R.-M. PRADEILLES-DUVAL and C. STOLZ	91	Mechanical transformations and discontinuities along a moving surface
E. VAN DER GIESSEN, M. W. D. VAN DER BURG, A. NEEDLEMAN and V. TVERGAARD	123	Void growth due to creep and grain boundary diffusion at high triaxialities
	167	Announcements

Number 2

J. LAMBROS and A. J. ROSAKIS	169	Shear dominated transonic interfacial crack growth in a bimaterial—I. Experimental observations
C. LIU, Y. HUANG and A. J. ROSAKIS	189	Shear dominated transonic interfacial crack growth in a bimaterial—II. Asymptotic fields and favorable velocity regimes
H. YU and W. YANG	207	Mechanics of transonic debonding of a bimaterial interface: the in-plane case
L. XIA and C. F. SHIH	233	Ductile crack growth—I. A numerical study using computational cells with micro-structurally-based length scales
C. BOSCO and A. CARPINTERI	261	Discontinuous constitutive response of brittle matrix fibrous composites
P. A. MARTIN	275	Mapping flat cracks onto penny-shaped cracks: shear loadings
K. HAUSLER and M. B. SAYIR	295	Nonlinear viscoelastic response of carbon black reinforced rubber derived from moderately large deformations in torsion

Number 3

J. R. WILLIS and A. B. MOVCHAN	319	Dynamic weight functions for a moving crack. I. Mode I loading
W. A. CURTIN and S. J. ZHOU	343	Influence of processing damage on performance of fiber-reinforced composites
D. A. SOTIROPOULOS and C. G. SIFNIOTOPOULOS	365	Interfacial waves in pre-stressed incompressible elastic interlayers
L. XIA, C. FONG SHIH and J. W. HUTCHINSON	389	A computational approach to ductile crack growth under large scale yielding conditions
S. E. SCHOENFELD, S. AHZI and R. J. ASARO	415	Elastic–plastic crystal mechanics for low symmetry crystals
J. FALESKOG	447	Effects of local constraint along three-dimensional crack fronts—a numerical and experimental investigation

Number 4

T. SIEGMUND, E. WERNER and F. D. FISCHER	495	On the thermomechanical deformation behavior of duplex-type materials
R. Y. S. PAK and B. B. GUZINA	533	Three-dimensional wave propagation analysis of a smoothly heterogeneous solid
Y. BENVENISTE	553	Correspondence relations among equivalent classes of heterogeneous piezoelectric solids under anti-plane mechanical and in-plane electrical fields
M. HAGHI	573	A framework for constitutive relations and failure criteria for materials with distributed properties, with application to porous viscoplasticity
A. A. YEVTUSHENKO and R. D. KULCHYTSKY-ZHYHAILO	599	Determination of limiting radii of the contact area in axi-symmetric contact problems with frictional heat generation
A. R. AKISANYA and A. C. F. COCKS	605	Stage I compaction of cylindrical particles under non-hydrostatic loading
I. A. POLONSKY and L. M. KEER	637	On white etching band formation in rolling bearings

Number 5

S. DJ. MESAROVIC	671	Dynamic strain aging and plastic instabilities
Z.-Z. DU and R. M. McMEEKING	701	Creep models for metal matrix composites with long brittle fibers
M. R. BEGLEY, A. G. EVANS and R. M. McMEEKING	727	Creep rupture in ceramic matrix composites with creeping fibers
A. BENALLAL and V. TVERGAARD	741	Nonlocal continuum effects on bifurcation in the plane strain tension–compression test
N. P. O'DOWD and W. G. KNAUSS	771	Time dependent large principal deformation of polymers
S.-X. WU, Y.-W. MAI and B. COTTERELL	793	Prediction of the initiation of ductile fracture
	811	Announcements

Number 6

J. HELSING	815	An integral equation method for elastostatics of periodic composites
Z. SUO	829	Wrinkling of the oxide scale on an aluminum-containing alloy at high temperatures
G. A. KARDOMATEAS, A. A. PELEGRI and B. MALIK	847	Growth of internal delaminations under cyclic compression in composite plates
T. W. SHIELD	869	Orientation dependence of the pseudoelastic behavior of single crystals of Cu–Al–Ni in tension
M. IBNABDELJALIL and S. L. PHOENIX	897	Creep rupture of brittle matrix composites reinforced with time dependent fibers: scalings and Monte Carlo simulations
Y. GRABOVSKY and R. V. KOHN	933	Microstructures minimizing the energy of a two phase elastic composite in two space dimensions. I: the confocal ellipse construction
Y. GRABOVSKY and R. V. KOHN	949	Microstructures minimizing the energy of a two phase elastic composite in two space dimensions. II: the Vigdergauz microstructure
